EXPERIENCE

Mar 2023 - Present

KupujemProdajem ⬈ | Senior Frontend Engineer · Full-time

Leading Serbian online marketplace with over 6 million active ads and more than 3 million registered users. Contributed to the development of new features, product improvements, and the ongoing maintenance of the platform.

- Collaborated with cross-functional teams to plan, build, and optimize new features using Next.js, React, and Redux. Focused on delivering solutions aligned with business goals and user needs.
- Monitored and optimized system performance, identifying bottlenecks and implementing strategies to enhance speed and responsiveness, ensuring a smooth user experience.
- Provided technical guidance and mentorship to junior developers, fostering growth and skill development within the team.
- Emphasized writing scalable, maintainable code, and introduced best practices to streamline development processes and maintain high code quality standards across the team.
- Monitored Sentry events, improving system stability, minimizing downtime, and addressing issues proactively.
- Ensured adherence to Code Health metrics tracked by CodeScene, striving to maintain high-quality, maintainable, and scalable code throughout the development process.
- Worked closely with product and business teams, providing technical insights and feedback to align product development with user expectations.

Dec 2018 - Mar 2023

Lioneve Media ⬈ | Frontend Team Lead · Full-time

Frontend Team Lead

- Led the frontend development team, including setting goals, monitoring performance, implementing strategies to improve productivity, and making key technical decisions to ensure high results and quality of work.
- Participated in planning, writing technical specifications, and developing key features using Next, React, and Redux, ensuring that each feature was well-integrated and aligned with the overall project goals.
- Mentored junior developers, providing guidance and support to help them grow professionally.
- Actively monitored system performance, identified areas for improvement, and optimized application performance to enhance overall efficiency.
- Implemented monitoring tools, such as Sentry, to ensure system reliability and stability.
- Led the development of a fan site, a social network platform, from initial planning to final deployment.
- The project was built using Next, React, Redux and Socket.io.
- Advocated for scalable, high-quality code and maintained a high code health score across the team, ensuring long-term maintainability of the project.
- Played a key role in migrating legacy systems to modern frameworks, reducing technical debt and improving platform scalability.

Frontend Developer

- Developed an in-house tool that significantly boosted company productivity, doubling work output.
- The project was built using Angular, TypeScript, and Socket.io.
- Collaborated closely with the design team, converting Figma designs into functional code.
- Implemented key features and functionalities while ensuring seamless backend integration.

Sep 2017 - Dec 2018

Telnet ⬈ | Frontend Developer · Full-time
